

Homeowner Lead and Copper Collection Instructions and Certification

Dear Homeowner,

Thank you for your assistance in collecting lead and copper samples. Lead and copper samples are being collected to determine the lead and copper levels in the drinking water. This sampling effort is required by the Colorado Department of Public Health and Environment and is being accomplished through your cooperation.

Please follow the sample collection guidance under 'Drinking Water' and 'Lead and Copper' at www.colorado.gov/cdphe/wqguidance and complete the certification below. Your water system will arrange times for sample bottle drop-off and pick-up (you'll not be required to contact a laboratory).

If you have any questions please call	at
